PG 142 Major Burner – For borosilicate work use the Regular Major Burner (without block). For soft glass (Effetre, Lauscha, etc) use the Major Model B (with block). The Model B blocks of the center flame ports which allows the

use of a softer flame when using this type of glass without loss of heat or excessive carbon buildup.

PG 158 Cane and Mosaic Cutters

The CANECTR1 is made for cutting small diameter cane and sheet glass for mosaics. Has carbide wheels which can be rotated for even wear. Also comes with a glass-catching bag which, when attached catches most all small cut off pieces of glass, keeping your work area cleaner. Can also be used to catch murrini pieces when cutting cane. Bag can be attached on either the left or right side for left or right handed use. Replacement wheels and springs available below. The CANECTR2 is an entry level version of the #1. Comes without glass-catch bag. When cutting cane on the 1 and 2, the cane is inserted on the INSIDE of the spring side. The CANECTR3 is the professional version of the 1 & 2. Comes with the glass-catch bag and can be used in either the left or right hand. Handle made of lightweight, long lasting aluminum.

Adjustable carbide cutting wheels. For small diameter cane or sheet glass only (6mm or less). The CANECTR4 is an inexpensive import cutter for cane or sheet glass. Will cut up to 9mm glass.

PG 161 Star Mashers are 25.00

PG 165 Essemce pipes do not come with steel collars.

PG 165 Diamond Shears approximate opening and blade length are as follows: 1= $\frac{3}{4}$ "x3", 2= $\frac{7}{8}$ "x3 $\frac{1}{2}$ ", 3=1"x4", 4= 1 $\frac{1}{2}$ "x5"

PG 167 ESSEMCE FOOTING TOOLS

These footing tools are adjustable up to the following sizes:

FS-3 Up to 45mm diameter foot

FS-4 Up to 55mm diameter foot

FS-5 Up to 75mm diameter foot

Smaller feet can be made by shortening the top plate accordingly.

COD: Orders can be sent COD by UPS or Fed Ex. UPS COD is an extra \$6.00, Fed Ex \$5.00. UPS & FED EX accept the following for payment: cashier's check, money order or certified check only. UPS and Fed Ex no longer accept cash for COD shipments.

PG 3 SPECIAL SERVICES

CANE CUTTING

Long lampworking rods can be cut in 1/3 lengths (Effetre, Murano, Lauscha). Less than 3 lbs. - no charge; orders of 3 lbs. or more will incur a \$0.50/lb cutting charge. Please let us know when ordering if you would like your rods cut in 1/3. If you do not specify, we will cut <3 lb. orders into 1/3's and NOT cut rods on orders over 3 lbs. Cutting rods can save shipping costs for small orders.

PG 3 SPECIAL SERVICES

SHEET GLASS CUTTING FEE INFORMATION

We can cut any glass to your specific sizes for a fee of \$10.00 per finished sheet. Tolerances are +/- 1/8". Non-standard cuts can be made by special arrangement.

PG 28 A note about compatibility. As with many types of glass, Effetre glass has a range of COE's. All Effetre colors are generally compatible with each other, even opalino and alabaster colors. This may be contrary to what many people believe. Both opalino and alabaster colors can be used with other colors in a "normal" bead PROVIDED IT IS FLAME ANNEALED PROPLERLY AND PUT IN AN ANNEALER WHICH IS SET TO THE CORRECT TEMPERATURE IMMEDIATELY. If you experience problems, chances are that one or the other items listed above was not followed correctly. See pg 8 & 9 for more compatibility information.

PG 145

We now carry the famous Arnold Zenit burners. All burners come complete with air, gas and oxygen hoses. The best of the best at a super price. One of the few burners that uses propane, oxygen and compressed air for combustion. All fuels & oxidizers mixes are pre-adjusted at the factory. You can adjust the flame from a pinpoint to a 25mm (1") diameter flame by turning a single dial. Truly one-handed operation. While it is primarily designed for borosilicate rods & tubes, it can also be used for soft glass rods & tubes. Pilot light is always on, so you can turn the burner down without turning it off. This function saves fuel and eliminates constant torch re-lighting.

83 COE Float Glass Compatible Paints

Thompson Enamel Glass Paints

These strongly pigmented; fine ground enamel colors can be used on float glass, 400 series stainless steel with or without an overcoat of transparent enamel. The eight colors can be mixed and intermixed like paint to create many different colors. The colors can be applied with a brush or sprayed on. Can be mixed with either oil or water based medium. Gives a much THINNER layer of color than enamel. Also gives a less brilliant color when used by itself. To intensify the color, layer over white.
